

SURF THE WAVE OF TRENDS

It's finally summer and the sun makes you want to makeover? Comarbois also wanted to get a makeover with our new "user friendly" website with a sleek design allowing you efficient navigation and a pre-filled quote request. So you too, take action: go to our Tit Mellil depot & to the Aïn Sebâa agency to find the products you need to carry out your renewal projects.

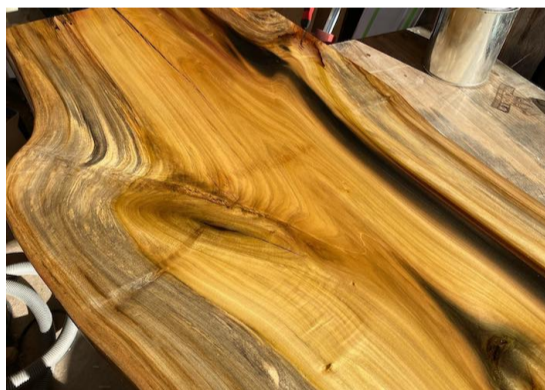

FALSE CEILING: A REAL ADVANTAGE

For all types of construction: office, education, health, industrial buildings... Comarbois provides you with false ceilings that meet a large number of requirements: thermal and acoustic insulation, fire and humidity resistance while offering the possibility of dismantling and painting them. False suspended ceilings represent a real advantage both in practical and aesthetic terms. Available at the Aïn Sebâa agency. Click for more info.

FORMWORK PACKAGE USED AT LAÏYOUNE HOSPITAL

We are honored: it is with Comarbois formwork products that the work of a very large project of the city of Laayoune was carried out: the University Hospital Center. It will open in 2023 and is built on an area of 30 hectares. For this project, H20 beams, triply panels, bakelised panels as well as formwork planks were used. Click to discover our special formwork offer.

COVER YOURSELF

As we know, the waterproofing of the roof of a house is something that should not be overlooked. Whether it's a new construction or a renovation project, bituminous waterproofing sheets are essential. In the form of a roll, this material is not very expensive and offers unparalleled effectiveness against infiltration. Available at Comarbois, click for more information.
